

Documentation

1. Dashboard

- **Expected:**
 - I was expecting to have a brilliant UI, where I didn't need to have any experience in designing UI.
- **Actual:**
 - I was amazed by the UI it designed for a chat application with multiple features. The UI was responsive, and there was smooth transitioning; the color palette was also good.
 - I was expecting that while doing a video call to a single user, my video would be visible, but it wasn't.
 - There was also a problem in generating chat summary.
- **Friction Points:**
 - There were no friction points. It was so simple to build.
- **Bugs or errors:**
 - No bugs or errors were present.
- **Missing or Unclear steps:**
 - The steps were simple and clear.
- **Outdated or incorrect documentation:**
 - It was up to date.
- **Suggestions:**
 - In my chat application, while sending texts to other users, I was expecting a response. You can improve this.

2. UI Kit Builder

- **Expected:**
 - I was expecting it to be easy to implement on my system.
- **Actual:**
 - It was easy to download. It was also easy to set up on my system.

- **Friction Points:**
 - There were no friction points.
- **Bugs or errors:**
 - No bugs or errors were present.
- **Missing or Unclear steps:**
 - The steps were simple and clear.
- **Outdated or incorrect documentation:**
 - It was up to date.
- **Suggestions:**
 - The process from building to exporting it was so simple and easy that it doesn't need any setup guide or anything. It's perfect.

3. Documentation

- **Expected:**
 - I was thinking that the Documentation was going to be very lengthy and complicated.
- **Actual:**
 - The documentation was so creative and concise.
- **Friction Points:**
 - There were no friction points. It was so simple to read the documentation.
- **Bugs or errors:**
 - No bugs or errors were present.
- **Missing or Unclear steps:**
 - The steps were simple and clear.
- **Outdated or incorrect documentation:**
 - It was up to date.
- **Suggestions:**
 - No suggestions.

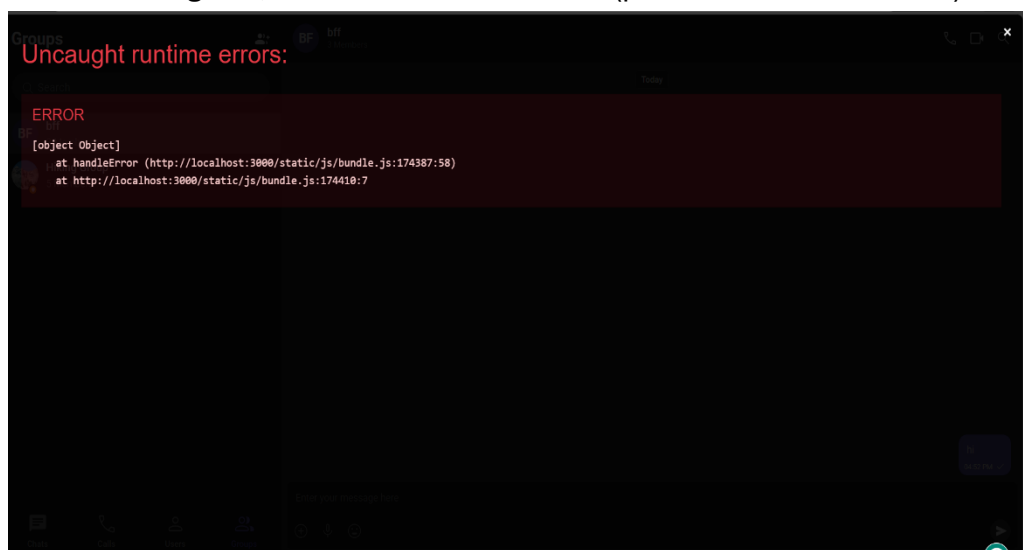

4. Actual UI Kit Implementation

- **Expected:**

- I was expecting it to be difficult. Also expecting it to be the same as shown on the Comet Chat UI.

- **Actual:**

- It was so simple to implement the UI kit. All I need to do is unzip the file and run 'npm install'. That was it. After deploying it on my system, it was not identical to the Comet Chat UI.
- Features were missing, like in the group as well as in a single user chat; there were features of the collaboration whiteboard and collaboration document. Stickers were also missing.
- While sending text, it shows a runtime error. (photo is attached below)

- There was also an issue while doing a video call to a single user; it didn't show my video.

- **Friction Points:**

- There were no friction points. It was so simple to build.

- **Bugs or errors:**

- No bugs or errors were present.

- **Missing or Unclear steps:**

- The steps were simple and clear.

- **Outdated or incorrect documentation:**

- It was up to date.

- **Suggestions:**

I want you to display all the features after deploying on local systems same as on your site.
